MEMORANDUM FOR U.S. Department of Justice, Federal Bureau of
Investigation

SUBJECT: (U) National Reconnaissance Office response to Classification
Review and Determination Request

Reference: (U) U.S. Department of Justice, Federal Bureau of Investigation
memorandum dated 2 November 2015 regarding "Classification
Review and Determination Request"

(U//~~FOUO~~) The Federal Bureau of Investigation (FBI) provided a
digital video disk to the National Reconnaissance Office (NRO) and asked
that the NRO conduct a classification review of the contents (14 e-mails,
1 e-mail attachment). The review is part of a potential compromise review
of U.S. Department of State (DoS) email communications from email accounts
previously used by a former Secretary of State during tenure at DoS.

(~~FOUO~~) A Classification Management Officer from the NRO's Office of
Security and Counterintelligence conducted a review of the materials and
concluded the files do not contain NRO information. The NRO cannot
establish the e-mails are unclassified, only that they do not contain
information considered classified by the NRO. The NRO systems may have
contributed intelligence to some of the scenarios addressed, but any
information derived from such collection would have been classified by the
agency developing the intelligence under their classification guides.
Further, other plausible non-NRO sources exist that would also be
consistent with timelines and relative lack of details. The NRO
recommends the National Security Agency, the National Geospatial-
Intelligence Agency, the Central Intelligence Agency, the Missile Defense
Agency, and Air Force Space Command be provided the opportunity to assess
for their equities.

(U) The NRO's completed Classification Review Response Tracker is
attached.

SUBJECT: Classification Review and Determination Request

~~(SBU)~~ Per your Letterhead Memorandum of 27 October 2015, the NASA Headquarters Office of Protective Services conducted a review of the compact disc that your Agency provided us in October of 2015.

~~(SBU)~~ According to the reviewer, Intelligence Analyst Darren Cowen, there was only one email on the compact disc for review. The email was correspondence between HQ NASA and the State Department attempting to set up a meeting between the NASA Administrator, Charles Bolden, and then Secretary of State Hillary Clinton. The classification review determined the email, Item ID 1546, was unclassified.

~~(SBU)~~ My point of contact for this matter at NASA HQ is Regional Counterintelligence Director Arthur R. Payton, (202) 358-4645.

Sincerely

Subject: Classification Review and Determination Request

(U//~~FOUO~~) In July 2015, the FBI received a Section 811 referral from the Inspector General for the Intelligence Community (ICIG) regarding the possible compromise of classified national security information.

(U//~~FOUO~~) The potential compromise was identified when, as part of a Freedom of Information Act (FOIA) request, the U.S. Department of State (DoS) and the ICIG reviewed electronic mail (email) communications from private email accounts previously used by a former Secretary of State during her tenure at DoS. An initial review of this material identified emails containing national security information later determined by the US Intelligence Community (USIC) to be classified up to the Top Secret/Sensitive Compartmented Information level.

(U//~~FOUO~~) The FBI respectfully requests the National Aeronautics and Space Administration (NASA) conduct an official classification review and determination of the related documents contained on the accompanying DVD.

(U//~~FOUO~~) The FBI understands that NASA may have previously received similar, separate requests from other entities for an official classification review and determination for some or all of the documents contained on the enclosed DVD. In order to ensure consistency, the FBI requests NASA de-conflict its response to this

FBI request with any previous classification determination responses related to these documents, and to provide the FBI the same classification determinations. The FBI requests NASA to provide as soon as possible any previously rendered official classification determinations of documents related to this matter, to include any classification determinations of documents related to the @clintonemail.com domain that are not contained on the attached DVD. The FBI requests NASA provide classification determination responses to the FBI on a rolling basis as they become available.

(U//~~FOUO~~) The enclosed DVDs each contain a *ReadMe.docx* file, which provides an explanation of the files contained on the DVD. The DVD also contains a Microsoft Excel spreadsheet titled *Classification Review Response Tracker* to assist your agency with tracking and responding to this classification review and determination request. The documents for review are listed in the *FileList.xlsx* spreadsheet and are contained in the *Items* folder. The *Items* folder is further explained in the aforementioned *ReadMe.docx* file. In the event NASA is aware of any equities belonging to other US Government agencies contained in documents provided as part of this request, the FBI requests NASA identify those other US Government agencies in the "Notes" section of the enclosed spreadsheet.

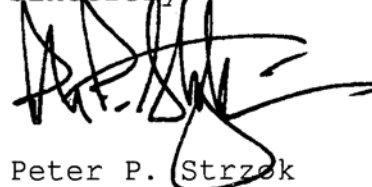

(U//~~FOUO~~) The FBI may contact you in the future to ask you to prioritize the review of certain items provided as part of this request.

(U//~~FOUO~~) You are requested not to disclose the existence of this inquiry, other than as necessary for compliance; disclosure may jeopardize the confidential nature of the FBI's investigation.

SUBJECT: FBI Supplemental Classification Review and Determination Request

(U//~~FOUO~~) This responds to the FBI's third request for a classification review of electronic mail (email) from private email accounts previously used by a former Secretary of State which you provided on a DVD-ROM. We have reviewed the two emails on this DVD-ROM and determined that there is no classified National Security Agency information contained within them. The documents on this third DVD-ROM are numbered 853 and 2307.

(U//~~FOUO~~) NSA will complete its review of the fourth DVD-ROM this week and inform you of the results of this classification review.

(U//~~FOUO~~) If you have any questions or concerns, please do not hesitate to contact me [REDACTED] If you have any additional documents that require NSA review, please forward them to me, and I will ensure a prompt review by this agency.

Following up on our prior conversation regarding the results of the classification review of documents the FBI provided to DOE in November 2015 and May 2015. Our review of those documents has not identified any classified DOE information. We note that some documents contained attachments that were in Korean characters. We did not translate that material nor review it for classification.

Finally, we understand that these documents were also delivered to the Central Intelligence Agency for classification review and defer to the CIA's review of these documents for any information they may have identified as classified pursuant to their classification guides.

We continue to review the remaining 9 documents and will have an answer for you soon.

Please let me know if you have any questions or wish to discuss our review further.

Best,
